Data Strategy & Security

Introduction

Data has become one of companies' most valuable assets and greatest risks.

The global flow of information creates constantly changing challenges: How do companies acquire, store, protect, use and share data to keep up with the competition, while reducing their legal and reputational risks?

Companies need an experienced and creative partner to work closely with them to formulate and

- Preparing for a ransomware attack or other significant cyber, privacy or AI event,
- Evaluating the data-related risks and benefits of an acquisition,
- Facing scrutiny over their cybersecurity or privacy policies and practices,
- Responding to investigations or litigation relating to a data breach, or
- Developing an artificial intelligence or big data program.

Named a **winner** in the “Innovation in Digitizing Legal Services” category by the *Financial Times*’ 2022 North America Innovative Lawyers Awards

Ranked as an “elite” firm for Privacy & Data Security.

“The team contains a deep bench of subject matter experts.”

“The depth of the group’s experience and the reach of their contacts within the industry are invaluable.”

Chambers USA, 2024

Ranked as a leading firm for Cyber Law (including Data Privacy & Data Protection).

“The expertise of the lawyers at Debevoise is unmatched. They have some of the most experienced lawyers in the trade.”

“The team’s breadth of knowledge stands out; I would consider them not just practitioners, but experts in the field.”

The Legal 500 US, 2024

Data Strategy & Security Services

The Debevoise Data Strategy & Security (DSS) practice is global and interdisciplinary—combining our cybersecurity, privacy, artificial intelligence, business continuity, M&A diligence and data governance practices into one fully integrated and coordinated group.

Together, we advise leading companies on preparing for and responding to cybersecurity incidents, and handling related regulatory and civil litigation matters. Our incident response matters range from ransomware attacks to insider threats to nation-state intrusions, and our ability to guide clients through the full range of issues in the most complex cross-border incidents has been our calling card.

We also advise our clients on their overall data strategy, including how to manage, protect, and optimize their data, including through the use of artificial intelligence. Our strategic advice includes both legal and technical assistance with the data issues that arise in M&A diligence, licensing and vendor contracting. In addition, we help our clients determine what data they should delete or not collect because of cybersecurity, privacy or other risks.

Our integrated strategic advice on data includes:

- Helping clients across the globe prepare for, and respond to, significant data breaches and related investigations and litigation. In addition to our U.S. offices, we serve clients from offices strategically located in the United Kingdom, France, Germany, China and Hong Kong. We also regularly work on matters that involve a wide range of other non-U.S. jurisdictions, including the EU and EEA, Japan, Singapore, Brazil, Canada, Colombia, Sweden and Argentina, to name a few.
- Identifying existing and proposed laws and standards in the United States and around the world that will impact our clients' use of data, including regulations and guidance relating to cybersecurity, privacy, AI, data minimization, records retention, document discovery and data governance.

Because we are constantly leading responses to significant cyber, privacy and AI incidents, we are able to channel that deep experience into helping our clients improve their preparations and resilience. Based on our incident work, we regularly assess our clients' incident response plans, policies, processes, training and resources, and make suggestions to allow them to more effectively respond to the latest cybersecurity, privacy and AI challenges that they face.

“Ransomware attacks are very complex and sophisticated; however, this group is able to break down this complexity in a tangible way.”

Chambers USA, 2023

A FULL RANGE OF DATA GOVERNANCE, PROTECTION AND PRIVACY SERVICES, INCLUDING CYBER INCIDENT RESPONSE AND MANAGING AI RISK

Our experience and advice covers the full spectrum of cyber threats (including from nation states, criminal ransomware groups, insiders, and critical vendors), as well as compliance with the ever-

- **360° Incident Response Services.** Debevoise helps clients navigate cyber incidents with the full range of services, including immediate crisis management, internal and external communications, fact investigation, breach notification, regulator and law enforcement engagement, civil regulatory investigations, defense of class action and derivative litigation and briefings to the board and C-Suite.
- **Engaging with Law Enforcement in the U.S. and Globally.** We are able to leverage our worldwide network of law enforcement contacts in the event of an incident. Our team includes several former federal cybercrime prosecutors, including the former leader of the Justice Department’s Criminal Division, the former leader of the Department’s response to national security cyber threats, and two other former Assistant U.S. Attorneys who brought landmark cyber cases in the country’s federal courts.
- **Review/Update Data Policies and Governance.** We can provide an assessment of the company’s policies and procedures for the protection and handling of consumer and employee personal data, as well as sensitive company information, with particular attention to mitigation of legal, business and reputational risks.

- **Cyber-, Privacy- and AI-Risk Assessment.** In today's dynamic regulatory environment, managing risks at the intersection of law and technology means measuring data protection and data optimization strategies against existing laws and regulations, as well as anticipated changes in the legal and threat environments. We review companies' cybersecurity, privacy and AI programs and assess them against existing and emerging legal standards. Our work ranges from leading a full legal and technical risk assessment of various data programs, typically performed in tandem with a technical vendor, to a targeted review of areas known to attract regulatory and enforcement focus.
- **Board/Executive Briefings and Training.** We regularly brief boards and company executives on the latest threats their companies face relating to data in order to help them assess risk, allocate resources, maintain appropriate insurance, prevent avoidable losses and discharge their oversight obligations. We also provide training on cybersecurity, privacy and AI risks to new executives and board members, as well as anyone wishing to learn more about their responsibilities in these areas.

- **Realistic Tabletop Exercises.** We are known for running extremely realistic cyber incident simulations or “tabletops” to help our clients prepare for adverse cybersecurity, privacy and AI events by conducting real-world drills of actual data events for various functions within the organization including Legal, Compliance, IT, Risk, Communications, Executive Management and the Board. These exercises, which regulators increasingly expect companies to conduct, allow our clients to test their incident response plans and see how their organization works through emergency data events, including ransomware attacks that shut down operations, insider data theft, whistleblower allegations of AI bias, state-sponsored hacking of sensitive commercial information, leaking of large volumes of customer or employee personal information and compromise of a critical vendor's information systems.

- **Vendor Risk Review.** Cyber incidents often involve exploitation of a vendor's trusted access to the company's systems, its handling of sensitive data on behalf of the company or risks posed by the vendor as a single point of operational failure. Accordingly, regulators have honed in on this challenging area. We work with our clients to develop practical, risk-based strategies to manage third party cyber, privacy and AI risks through their policy development, diligence efforts, contractual terms, and insurance strategies.
- **M&A Due Diligence.** Data risks are increasingly prominent in M&A due diligence and in the post-acquisition integration process. We often lead cyber, privacy and AI diligence investigations around the world, including advising on policies and procedures for due diligence and for integration generally, as well as on risks and issues raised by specific actual or potential acquisitions and investments.
- **Insurance.** Companies increasingly are concluding that cyber-, AI-, and privacy-specific insurance policies are essential. Our team has significant experience working inside the insurance industry and can review existing policies to assess coverages and exclusions.

REAL-WORLD EXPERIENCE

Our services are based on experience in the trenches of many of the country's landmark cyber and privacy incidents (including many non-public incidents). Our lawyers have deep technical knowledge that allows them to translate complex technical findings into legal and business decision points. This has enabled us to provide a pragmatic approach to identifying and coordinating the key elements of effective incident response and overall data strategy.

Before joining Debevoise, partner Luke Dembosky served as Deputy Assistant Attorney General for National Security, managing the Justice Department's work on all national security cyber incidents, including the cyber attack on Sony Pictures and the landmark breaches of Target, The Home Depot, Anthem and the U.S. Office of Personnel Management, among many others. At Debevoise, Luke co-chairs the cyber and privacy practice, acting for the firm's clients on high-profile and high-stakes global and U.S. breach matters.
